Footnotes: 1) Distributions to shareholders are presented on Form 1099-DIV which will be mailed in January 2021. The Fund's NAV will drop on the Ex-date to reflect the adjusted NAV after the distribution. NAV on the payment date will also be impacted by each Fund's market performance on the securities held in its portfolio. 2) **Ex-date**, or ex-dividend payable date, is the date a security is traded without a previously declared dividend or distribution. After the ex-date, a security is said to trade ex-dividend. The ex-date is the date on which the seller, and not the buyer, of a stock will be entitled to a recently announced dividend. 3) **Record date** is the date established to determine which shareholders are eligible to receive a dividend or distribution. Shareholders of record as of the record date will be entitled to receive the dividend or distribution paid by the Fund. 4) **Pay date** is the date on which a declared distribution is scheduled to be paid. 5) **NAV is the Fund's net asset value as of October 20, 2020.**
